

# DOWN THE RABBIT HOLE

An Honest Discussion of Politics, Religion, and all Kinds of Things we are not Supposed to Talk About.

VOL 2: 2nd EDITION

JANUARY 05, 2017

---

## OBAMA SAYS THIS, TRUDEAU SAYS THAT, SANTA CLAUS SAID THE OTHER THING

**W**hat a lot of nonsense it is to think that a single man or woman makes the decisions regarding government's ways of helping corporations and wealthy jews. or supposedly doing something to benefit the sheeple. Of course, we at the Down the Rabbit Hole know it is a lot of malarky. The CEOs of the various countries; ie: the Prime Ministers, Presidents, Pompous Windbags, whatever are merely puppets who represent the likes of the Rothschilds, Rockerfellers, Bundies, Collins, the Bush League, the Clintons.... et al. All of them rapacious criminals mostly of a jewish persuasion or outright shape shifting alien beings as has been well documented by people such as, David Icke, or Steven Greer. If one does a modicum of reflection and is honest, one can easily recognize how average most world 'leaders' actually are. There are exceptions, of course. The Amazing Geert Wilders in the Netherlands comes to mind. And, of course, the Incredible Vladimir Putin in Russia and now, the Awesome Donald J. Trump in the USA. Hopefully men such as these will help to pull the people together and collectively we overcome the Satanic menace plaguing us. We know who they are, and you do too. Admit it. You know it is the Jews who are behind all the malfeasance destroying this planet. They control the corporations. They control the media. They control the Muslims. They control most people, whose minds have been totally rendered into mush by the machinations of the jews; machinations such as poisoning drinking water with the scrapings of the chimneys of fertilizer plants, commonly known as, Fluoride. Back in 1939 there were only, 3.3 million of them in Europe. Not much more, world wide. Now they number 17 million and are reproducing and implanting their Talmudic poison into the minds of increasing numbers of jewlets. If they and the Muslims are not stopped immediately, we, who are not them, are in for a very rough ride.

## WHAT DO YOU CALL CATTLE?

**C**attle are, stock. They are stock which goes to market. The stock market. Some of you go there, as well. The Stock Markets which human beings go to are those jewish shell games where you can put your money down and hope someone doesn't manipulate matters so that you lose your shirt. Happens all the time in the stock market. People lose their lives there. Let me explain how things work in the Jew York Stock Exchange, for example. International banksters work with billions and trillions of dollars which move about electronically. Buying and selling takes place in the matter of seconds as a billion dollars makes a point zero, zero, zero ... 1% in a second or two, which amounts to millions of dollars profit. If you happen to be lucky and you have some money in a stock they are supporting and playing with, you may win. The stock market is a roulette wheel, for the most part, except, unlike regulated carnival wheels, jews scheme and scam and work wonders with money and gold; but just for them and they control the JUST US system, since most lawyers, judges, and prosecutors are jews; who have swept the Common Law/Natural Law under the rug and have replaced it with their Talmudic abomination known as, Admiralty Law; the Law of the sea, where anything can be done in International Waters. Jews run

massive floating gambling hotels out there where they further fleece the sheeple in steel cans of people soup. Not our choice for a vacation. You might want to reconsider a cruise this winter. Also, you might want to second guess your flight plans. Airlines do not wash the pillows and blankets, for example. They are reused and often time so are the ear buds, it only appears they are fresh because they are repackaged. As for the food, well, let's not go there. It might put you off your breakfast.

## **IN PRAISE OF CHICKENS AND COWS**

**How many of you still drink milk? How many of you still eat meat? How many of you eat eggs? How many of you enjoy a lovely fried chicken now and then?**

When you consider how much of our meals are based some way or other on the products produced by chickens and cows, it is quite amazing how beneficial those creatures are to us. Steaks come from bovines/cows. Butter, cheese, milk, and that delicious thick cream with which to make that perfect cup of coffee in the morning, all comes from bovines; a gentle creature which is fattened up and then finished by killing the animal from the inside out with a grain diet towards the last few months before it goes to the stock market. The grain ferments in the stomachs of the cow and create alcohol which destroys the animal's organs and then makes for that marbly effect in the muscle tissues; the fat in steaks which give them that extra special flavour; which now a days, is a heavy metal and industrial poison concentration; since the many drugs fed to the animal throughout its development coagulate in the fat. It is not burned off when you BBQ that muscle on a grill. Unfinished beef is available, that would be meat with almost no fat in the tissue and not such concentrations of poison. However, the animal is eating irradiated grass, upon which massive amounts of chemicals are dumped by the chem trail air planes and what wafts over from the neighbor's field. Chickens, also, are fed chemicals and are raised in very unnatural conditions which creates a tremendous amount of stress in those industrialized birds. The agony of having to live inside with thousands of other chickens, all of them seeking space to peck and roam and seek a roosting spot, makes the chicken's brain insane and it sends out hormonal signals which makes for a very sorry creature that should not be consumed since it is full of toxic, negative energy. Free range, happy chickens make far better soup, and a tastier drumstick.

**OUR SUGGESTION IS TO BUY LOCAL.** BUY FROM FARMERS YOU KNOW and trust. you can no longer trust your international corporations to make good food for you. those companies are only concerned with their bottom line not your good health.

Remember most large corporations are owned by very few people and many of them are jewish. A jewish family owns WalMart, for example. The owners are worth billions and yet, in places, WalMart have set up food collection and donation bins to help support their starving staff. It is high time that these huge factories serviced by slaves, be made to profit share with their staff. People deserve living wages and the minimum wage does not do that. WalMarts suck millions of dollars out of a town or city; all of that could go to locals.

Canada is now a service economy where most people in jobs earn a minimum wage or slightly above. Manufacturing is dwindling in Canada as more and more international box enterprises set up shop and sell Canadians things made elsewhere. It just goes to show how useless our politicians are. They have allowed our country to be sold off, lock, stock and barrel. They have allowed the increasing poverty of our population and increased the rules and regulations keeping them at bay. Canada should be completely self sufficient and should tell the rest of the world, take care of your own business, as well. More of this in future issues. We have to rethink how we do things in Canada and make her great again, as well. GO MISTER TRUMP!
